HISTORY

Named after its appearance, this Wahana Longberry is relatively long compared to other varieties. This Longberry varietal originated from Ethiopia Harrar and planted in Aceh region over three centuries ago. It was first planted in Wahana Estate in 2006. Growing Longberry varieties is a slow process and only reached maturity after 7 years, unlike other varieties that generally only takes 3-4 years in Indonesia. Wahana Longberry has low yield per tree which in turns resulting in intense cup profiles
