HISTORY

Mondul Coffee Estate is a sustainably managed farm located on the slopes of Mount Monduli in Tanzania, with a rich history dating back to 1931. The estate spans over 511 hectares with over 266 hectares dedicated to growing high-quality Arabica beans at elevations of 1600-1800 meters. This unique environment, including the proximity to Mount Monduli and the cultural communities surrounding it, contributes to the farm's exceptional coffee. Mondul Coffee Estate is renowned for its honed production techniques, effective quality control systems, and harmonious approach to nature. The farm fosters a sense of community among its employees and encourages personal and professional growth, through various projects such as dairy farming, land allocation, and beekeeping. The company aims to create a sustainable workplace where everyone can take pride in their work, achieving long-term sustainability for the farms.
